

## Digital Panel with 16 targets PANEL 4 TARGETS RECTROILLUMINATED

Exemple of installaction

Network connections are made at the same way as the connection in derivation. The difference consist of using the equipment boxes to make the connections, suppressing the derivation boxes.

For the targets connection we recommend you to use the electric wires of 0.25 or 0.50 mm<sup>2</sup> of section.

Electric connections for panels of 4 retroilluminated targets are made of the same way.
